

## **INDUSTRIAL SCAFFOLD TRAINING PACKAGE**

Due to the evolving industry in Western Canada and here in Newfoundland, Petrell HSE Technologies is proud to offer an industry ready 10 week Industrial Scaffold Training package. This package consists of 8 weeks of scaffold theory and practical training in Tube and Clamp Scaffolding and System Scaffolding. In the remaining 2 weeks, participants will complete the following safety training courses:

- H2S Alive • Standard First Aid • Fall Protection • Confined Space Entry
- Rigging, Slings & Banksman • Powerline Hazards • Alberta CSTS

This is a thorough training package designed to provide participants with entry level knowledge of all aspect of scaffolding including commonly used terminology, component inspection, safe erecting and dismantling, inspection of finished scaffolds and other related topics. This industry ready training package will ensure that participants are fully trained to meet the employer's needs in an ever growing industry.

Petrell HSE Technologies can also provide client specific training of any duration and industry (onshore/offshore). The training will follow applicable regulations, standards (CSA-0150 Z797, BS 5973) and guidelines (CAPP) that demonstrates the proper selection, inspection, erection, alteration, dismantling and maintenance of scaffold structures and associated equipment.
